

Textbook Chapter 6 Review – Answer Key

Checking Concepts

- (a) Neutralization
(b) Synthesis
(c) Synthesis

- (d) Decomposition
(e) Neutralization
(f) Double replacement
(g) Single replacement
(h) Single replacement
(i) Double replacement
(j) Combustion

- (a) $\text{Al} + \text{F}_2 \rightarrow \text{AlF}_3$
(b) $\text{K} + \text{O}_2 \rightarrow \text{K}_2\text{O}$
(c) $\text{C}_2\text{H}_6 + \text{O}_2 \rightarrow \text{CO}_2 + \text{H}_2\text{O}$
(d) $\text{C}_6\text{H}_{12}\text{O}_4 + \text{O}_2 \rightarrow \text{CO}_2 + \text{H}_2\text{O}$
(e) $\text{Rb}_2\text{O} \rightarrow \text{Rb} + \text{O}_2$
(f) $\text{Sr} + \text{F}_2 \rightarrow \text{SrF}_2$
(g) $\text{BaCl}_2 + \text{Pb}(\text{NO}_3)_2 \rightarrow \text{Ba}(\text{NO}_3)_2 + \text{PbCl}_2$
(h) $\text{AgNO}_3 + \text{K}_2\text{Cr}_2\text{O}_7 \rightarrow \text{KNO}_3 + \text{Ag}_2\text{Cr}_2\text{O}_7$
(i) $\text{Br}_2 + \text{NiI}_3 \rightarrow \text{NiI}_3 + \text{Br}_2$
(j) $\text{Cl}_2 + \text{Mg}_3\text{N}_2 \rightarrow \text{MgCl}_2 + \text{N}_2$
(k) $\text{HCl} + \text{Mo}(\text{OH})_2 \rightarrow \text{MoCl}_2 + \text{H}_2\text{O}$
(l) $\text{Sn}(\text{OH})_2 + \text{HClO}_3 \rightarrow \text{Sn}(\text{ClO}_3)_2 + \text{H}_2\text{O}$
(m) $\text{Al} + \text{CuI}_2 \rightarrow \text{AlI}_3 + \text{Cu}$
(n) $\text{Mg} + \text{FeF}_2 \rightarrow \text{MgF}_2 + \text{Fe}$

- (a) Decomposition
(b) Synthesis
(c) Neutralization
(d) Single replacement, combustion
(e) Combustion
(f) Double replacement, neutralization
(g) Single replacement
- (a) Concentration
(b) Surface area
(c) Temperature
(d) Concentration
(e) Concentration
(f) Catalyst
(g) Surface area
(h) Concentration

- (h) Combustion
$$2\text{C}_3\text{H}_8\text{O}_3 + 7\text{O}_2 \rightarrow 6\text{CO}_2 + 8\text{H}_2\text{O}$$

(i) Synthesis
$$\text{N}_2 + 2\text{O}_2 \rightarrow 2\text{NO}_2$$

- Reaction systems that do not have a surface, such as between two gases or between two liquids that completely mix into each other, are not affected by surface area considerations. If the reaction system has two or more distinct regions, such as a solid placed in a liquid, then there is a surface and surface area is a factor.

Applying Your Understanding

- Surface area > temperature > concentration
